

I once was thought the FCC reduction of monopolistic station ownership might be overstated as to its destructive impact upon the republic. Sinclair has proven it is indeed an impediment to our democracy. It is ever so clear how wrong and foolish my opinion was given Sinclair Broadcasting's mandate that their stations to air intentionally biased and grossly manipulated anti-Kerry documentary days before the election. There has been no effort or offer made to provide equal time to other candidates for airtime.

This shameful exercise reflects directly on the FCC. It is definitive proof the policies increasing ownership and power of media empires must be rolled back and curbed. Failure to do so undermines the fundamental building blocks of our country.

Regards,

Guy Hanacek
